

# Problem 1 - Binary stirling Numbers.	d de
program dibuat sesuai perumusan yg diberikan soul.	
maka saya buat menggunakan rekursit, karena belu	М
menemukan ide solusi yang baik.	

## Source code □

```
#include <stdio.h>
int S(int n, int m){
        if(n==0 && m==0){
                 return 1;
        else if((n>0 && m==0) || (m>0 && n==0)){
                 return 0;
        }
        else if(n > 0 \&\& m > 0){
                 return m*S(n-1, m) + S(n-1, m-1);
        }
}
int main(){
        int t; //jumlah testcase
        scanf("%d", &t);
        while(t--){
                 int n, m;
                 scanf("%d %d", &n, &m);
                printf("%d\n", S(n, m)&1);
        return 0;
}
```
